

# MPL International Package Delivery API

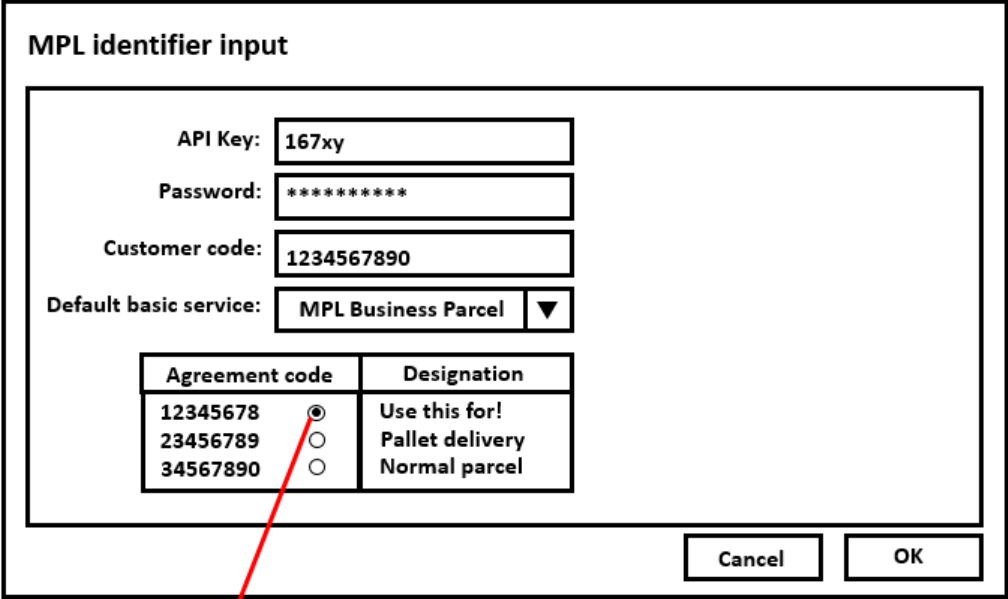

## Proposals for International Business Integration

### For Companies Operating E-commerce Engines

If you operate an e-commerce engine and would like to make MPL's international package delivery services (MPL API) available to companies using your platform, it is advisable to proceed as follows:

### Configuration

It is recommended to create a configuration page for individual clients, similar to the example below, where they can input their company information and certain default values.

The image shows a configuration window titled "MPL identifier input". It contains several input fields and a table. A red arrow points from the text "To mark default value" to the first radio button in the table.

**MPL identifier input**

API Key:

Password:

Customer code:

Default basic service:  ▼

| Agreement code |                                  | Designation     |
|----------------|----------------------------------|-----------------|
| 12345678       | <input checked="" type="radio"/> | Use this for!   |
| 23456789       | <input type="radio"/>            | Pallet delivery |
| 34567890       | <input type="radio"/>            | Normal parcel   |

Cancel OK

To mark default value

It is recommended to store the data in a database. Wherever possible, the API key and password should be stored in an encrypted format. There is a 1:1 mapping between the customer code and the API key/password—each company will have only one such set of credentials.

Clients can choose from the following international basic services:

- Package (A\_121\_CSG)
- International Priority Package (A\_122\_ECS)
- Europe+ Package (A\_123\_EUP)
- EMS (A\_13\_EMS)
- MPL Europe Standard (A\_125\_HAR)
- Inverz (Return delivery) MPL Europe Standard (A\_125\_HAI)

Each customer may have multiple agreement codes, although smaller companies might only use a single agreement code. It is advisable to associate a textual description with each agreement code, enabling the customer's employees to make selections based on these descriptions during the package submission process.

Additionally, it is recommended to allow the configuration of a **default agreement code**, which would appear as the pre-selected option on the interface for easier and faster use.

|                                                                 | Maximum weight |
|-----------------------------------------------------------------|----------------|
| <b>Package (A_121_CSG)</b>                                      | 20 Kg          |
| <b>International Priority Package (A_122_ECS)</b>               | 20 Kg          |
| <b>Europe+ Package (A_123_EUP)</b>                              | 30 Kg          |
| <b>EMS (A_13_EMS)</b>                                           | 30 Kg          |
| <b>MPL Europe Standard (A_125_HAR)</b>                          | 31,5 Kg        |
| <b>Inverz (Return delivery) MPL Europe Standard (A_125_HAI)</b> | 31,5 Kg        |

## General Recommendations for All Companies

### *Weight-based Limitations*

The maximum weight limits for different international products vary. It is recommended to enforce these limitations during the ordering process to ensure compliance.

### Destination Country-based Limitations

The available destination countries for each international product vary. In the case of Magyar Posta's export parcel services, countries are categorized into zones (indicated by the numbers in the white fields of the table below). These zones are primarily used for pricing considerations by Magyar Posta and its clients.

Services marked in the gray fields are not available for the respective countries.

## Submitting Package Data

The submission of package data is prepared through the following conceptual screen design.

### Sending parcel data to MPL

**Ordered items**  
Apple  
Pear  
Peach

Number of parcels:   
Weight of a single parcel:  g  
Dimensions of a single parcel:  ▼  
Retention time  ▼ working day(s)  
Pallet delivery ☒

**Agreement code:**  
Default agreement code ▼  
**Basic Service:**  
Default parcel type ▼  
**Additional services:**  
☒ Payment for goods:  Ft  
...

Name:   
Address:   
E-mail:

In addition to the basic information (customer name, address, phone number, etc.), the following data must be provided:

#### Agreement Code

Optional, with a default value set on the configuration page.

#### Basic Service

Optional, with a default value set on the configuration page.

#### Package Weight

Mandatory. If the weight is unknown, MPL requires an estimated value.

#### Additional Services

By selecting the base service, it is advisable to update the list available to the user:

The following additional service can be utilized for international package services, which varies by product.

|       | A_121_CSG | A_122_ECS | A_123_EUP | A_13_EMS | A_125_HAR | A_125_HAI |
|-------|-----------|-----------|-----------|----------|-----------|-----------|
| K_ENY | X         | X         | X         | X        | X         |           |
| K_GLO | X         | X         | X         | X        |           |           |
| K_LEZ | X         | X         | X         | X        |           |           |
| K_POT | X         | X         | X         | X        |           |           |
| K_TEP |           |           |           | X        | X         | X         |
| K_TER | X         | X         |           |          |           |           |
| K_TEV |           |           |           |          |           |           |
| K_UVT | X         | X         |           |          | X         |           |
| K_VNY | X         | X         | X         | X        |           |           |

- **K\_ENY: Declared Value (Package Insurance Service)**  
Used for valuable shipments.  
In case of loss, destruction, damage, or deficiency, the Post compensates based on the declared value.  
If selected, the item.value parameter must be provided.
- **K\_GLO: Global Service**  
Required for packages destined within the EU but originating from a third country.  
Customs data submission is mandatory in this case.
- **K\_LEZ: Postal Seal**  
Applies in specific cases requiring secure postal sealing.
- **K\_POT: Supplementary Export Customs Form**  
Applicable for postal shipments addressed outside the EU containing goods valued at €1,000 or more, or in cases specified by law (regardless of value).  
Requires the completion of a customs service request form and any necessary export permits, submitted alongside the package.  
One supplementary form covers three items.
- **K\_TEP: Home Pickup**  
Pickup from home or specified address based on requests made via phone or email.
- **K\_TER: Bulky Package**  
Applicable for packages exceeding the size or shape parameters defined per country and product or for non-rectangular packages.
- **K\_TEV: Acknowledgment of Receipt**  
Used to confirm receipt acknowledgment.  
The acknowledgment form must be printed outside the API.
- **K\_UVT: Cash on Delivery (~COD)**  
Payment upon delivery service for goods.
- **K\_VNY: Providing an Export Accompanying Document** – The postal customs brokerage service can be utilized for postal items destined outside the European Union (EU) containing a value of 1,000 euros or more (or its equivalent in Hungarian forints), as well as in cases defined by specific legal regulations (for items with dutiable content), regardless of their value, upon the customer's request. This requires completing the relevant authorization form and, if necessary, attaching export permits at the time of the postal dispatch of the item.

## Limitations

It is advisable to enforce these limitations on the interface before invoking the MPL API. Since these limitations rarely change, this approach can prevent most potential error messages.

Key considerations:

- Cash on Delivery Value Limits: For details or specific requests, contact Magyar Posta's representative.
- Maximum Declared Value: The maximum amount for declared value varies by product.

| Maximum Value Declaration                  |                 |
|--------------------------------------------|-----------------|
| Package (A_121_CSG)                        | 4.000 DTS (SDR) |
| International Priority Package (A_122_ECS) | 4.000 DTS (SDR) |
| Europe+ Package (A_123_EUP)                | 120.000 HUF     |
| EMS (A_13_EMS)                             | 1.000.000 HUF   |
| MPL Europe Standard (A_125_HAR)            | 150.000 HUF     |

## Size Limits for Bulky Additional Services

The size limits associated with the bulky package service are detailed in Magyar Posta's *Országlapok* publication. The standard size limits for services are as follows, while country-specific variations are outlined in the *Országlapok*.

| Size Limit                                        |                                                                                                                                                                       |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Package (A_121_CSG)</b>                        | Size limitations are based on the regulations for the destination country, as specified in the COUNTRY SHEETS.                                                        |
| <b>International Priority Package (A_122_ECS)</b> | Size limitations are based on the regulations for the destination country, as specified in the COUNTRY SHEETS.                                                        |
| <b>Europe+ Package (A_123_EUP)</b>                | The maximum dimension in any direction cannot exceed 1500 mm, and the total dimensions (length + 2 × width + 2 × height) cannot exceed 3000 mm.                       |
| <b>EMS (A_13_EMS)</b>                             | The maximum dimension in any direction cannot exceed 1500 mm, and the total dimensions (length + 2 × width + 2 × height) cannot exceed 3000 mm.                       |
| <b>MPL Europe Standard (A_125_HAR)</b>            | The maximum dimension in any direction cannot exceed 1200 mm, and the combined dimensions in the other two directions (width and height) must be between 600–6000 mm. |
| <b>Inverse MPL Europe Standard (A_125_HAI)</b>    | The maximum dimension in any direction cannot exceed 1200 mm, and the combined dimensions in the other two direction                                                  |

## Mandatory Parameters for Additional Services

When selecting certain additional services or delivery methods, specific parameters must be provided in the MPL API interface. These are summarized in the table below:

| Additional Service | Delivery Method | JSON Field to Fill  | Value                          |
|--------------------|-----------------|---------------------|--------------------------------|
| K_ENY              | -               | item.services.value | Declared value in HUF          |
| K_UVT              | -               | item.services.cod   | Cash-on-delivery amount in HUF |

## API Error Codes

The MPL does not support all service combinations, and there are also value and weight limits applicable to certain services. By checking the limitations described above, 95% of the errors can be avoided. The error codes are included in the technical documentation of MPLAPI.

## Shipping Labels for Export Packages

The shipping label templates for different package categories are as follows:

**Package (A\_121\_CSG) International Priority Package (A\_122\_ECS)**-The main difference between these two categories lies in priority handling. For the International Priority Package, the "Priority" checkbox is marked in the International Parcel section, while for standard packages, the "Non-Priority" checkbox is marked.

| 153                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  | CP 72 Többlapos nemzetközi csomagszállító, 1. lap – CP 72 Feladóvény                                                                                                                                                                                                                                                                                           |  | 153                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
